ABSTRACT

This investigation is centered study CREATIVE ABILITY AND ITS IMPLICATION ON IMPROVING THE DEVELOPMENT OF SOCIAL SKILLS IN SOCIAL WORK STUDENTS OF UNJFSC - HUACHO - 2014. This correlational research a theoretical level was developed and applied a design not experimentally ex post facto to the sample set out in the study. The research is part of the positivist epistemological qualitative and quantitative approach, whose purpose is to describe, explain, control and predict knowledge. For purposes of the case study data collection techniques such as questionnaires and direct observation, which could be validated using the statistical method known as Cronbach coefficient and content validity by the technique of qualitative inquiry addressed were applied to academic experts. The results indicate that there RELATIONSHIP between CREATIVE ABILITY AND ITS IMPLICATION ON IMPROVING THE DEVELOPMENT OF SOCIAL SKILLS IN SOCIAL WORK STUDENTS OF UNJFSC - HUACHO - 2014, in addition to consider their activities lead to sustainable development of the learning achieved by students, which suggests that the overall perception of teachers with this methodology becomes more challenging and dynamic work of teachers.
